

## Optional Remote Options

### MonoTel

The MonoTel is a single channel transmitter, designed to be used, to operate a single shutter.

### VarioTel

The VarioTel is a multi channel transmitter is designed to operate up to five shutters individually or collectively as a group.

### Somfy Tellis 1 & 4 RTS

The Somfy Tellis 1&4 RTS handset is designed to operate one to four shutters individually or collectively as a group.

### Somfy Tellis 16 RTS

The Somfy Tellis 16 RTS handset can operate up to sixteen shutters collectively or individually. The LCD display allows each group or location to be labelled for identification.

### Somfy Tellis 6 Chronis RTS

The Somfy Tellis 6 Chronis RTS has all the convenience of the Tellis 16 but the additional benefit of a timer function.

### Key Switch

All commercial shutters come with a Key Switch as standard.

Other remote options also available. Please contact the office for further details

## Optional Safety Equipment

### Manuel Override Facility

In the event of a power failure the shutter curtain can be manually wound.

There are several variants available. Please contact the office for further details

### UPS Battery back up

If a manual override is not practical option for you then a battery can be fitted.

In the event of a power failure this unit will provide power to the shutter and allow for 2 to 3 full cycles.

### Pro-Mate Control Panel

Used in conjunction with the UPS Battery back up.

### Safetyedge

An optical safety edge will stop the shutter operating should it meet and obstacle The curtain will then stop and return to the start position .

This option is highly recommended if the shutter is fitted over doors.
